

VIDEOS

(Listed Alphabetically)

A CALL FOR DR. REDD

SET 680V

24 minutes

Helps make health care personnel aware of the major fire hazards that may exist in hospitals. Shows steps to be taken whenever fire or smoke is discovered.

ACCIDENT INVESTIGATION

SET 256V

ACCIDENT INVESTIGATION

SET 605V

15 minutes

Uses live action to cover all aspects of a comprehensive investigation - site examination, interviewing witnesses, photography and analysis.

ACCIDENT INVESTIGATION IN THE WORKPLACE

SET 696V

22 minutes

Takes viewers step-by-step through investigation procedures used by experts to discover the true causes of accidents.

ACCIDENT INVESTIGATION: MAKE YOUR INVESTIGATION COUNT

SET 517V

11 minutes

Covers proper accident investigation. How to interview witnesses, understand causes of work accidents and write concise reports. (Same as SET

193F)

AERIAL LIFT SAFETY

SET 729V

13:00 Minutes

Training program for all employees who operate or work around aerial lifts. Real-lift in chemical and manufacturing facilities, refineries, and municipalities. Subjects include pre-operation inspection; preparing the work site; vehicle stabilization and traveling; safe work practice on platforms; and working near electrical lines.

AIR PURIFYING RESPIRATORS

OH 231V

18:48 Minutes

Designed to provide an overview of respiratory hazards in the workplace and to demonstrate when an air purifying respirator (APR) needs to be worn and how to use it properly. Details evaluation and control of hazardous atmospheres and correct selection of respirators as it relates to the hazard. Fit testing, donning, care and maintenance are demonstrated.

ALCOHOL & OTHER DRUGS

SET 527V

4 minutes

**AMERICA IN JEOPARDY -
DRUGS IN THE WORKPLACE**

SET 739V

20 minutes

This video can be an important part of the turn around process. See and listen to workers talk about the devastating effects of substance abuse on job performance and how it effects co-workers. This video can help concerned employers help their employees.

ARC WELDING SAFETY

SET 518V

17 minutes

AROUND EVERY CORNER

SET 666V

16 minutes

Conducting planned safety inspections. A new supervisor learns that regular inspections can mean the difference between a safe environment and a place where accidents are waiting to happen.

**AS IT SHOULD BE DONE - Workplace Precautions
Against Bloodborne pathogens**

OH 233V

24:10 minutes

A popular video which assists employers in training exposed employees in OSHA's bloodborne pathogens standard. Includes the proper use of personal protective equipment and the benefits of the HBV vaccine.

**ASBESTOS:
UNDERSTANDING THE HAZARDS
OH 100V**

24 minutes

Discusses the way asbestos enters the body and describes how these fibers cause disabling or life threatening diseases. Warns against smoking and asbestos exposure. Appropriate work practices, personal protective equipment and tools also covered.

ATMOSPHERE SUPPLYING RESPIRATORS OH 218V

15 minutes

Describes the basic types of air line and SCBA respirators and illustrates advantages and limitations. Emphasizes proper donning procedures, fit checks, use and maintenance.

ATTITUDE AWARENESS

SET 674V

27 minutes

Helps employees to identify how their attitude affects their job performance, especially safety performance.

Four employees recognize the responsibility they each hold for their own actions.

AVOIDING COMPUTER STRAINS AND PAINS OH 115V

14 minutes

By establishing ergonomically correct workstations, employees can avoid physical stress as well as costly repetitive motion disorders such as carpal tunnel syndrome. Discusses methods to reduce eye strain, increase circulation and avoid overall fatigue.

BACKHOE SAFETY

SET 698V

18 minutes

Provides a general guideline for safely operating a backhoe. The appropriate personal protective equipment, pre-start-up checklist, safe start-up procedures, safe loading and unloading steps, safe digging and lifting and on the road safety are explained and illustrated.

BACKS, A BIT ABOUT

SET 700V

MODULE 1: BACK BASICS

MODULE 2: RISK FACTORS

MODULE 3: PREVENTION STRATEGIES

Each module focuses, in a humorous way, on back care in day-to-day living, on and off the job. The modules will help employees understand how their backs work and how to make choices to protect themselves from injury.

BLOODBORNE PATHOGENS - THE HUMAN FACTOR

OH 120V

20 minutes

Gripping real life stories reveal the dangers of bloodborne diseases and teach needlestick prevention, the benefits of HBV vaccination, exposure reporting and follow-up, and other elements of the

OSHA standard.

**BLOODBORNE PATHOGENS -
THE OSHA STANDARD FOR EMS**

OH 130V

20 minutes

Fulfills many of the annual employee training requirements including understanding your exposure control plan, recognizing unsafe situations, emergency procedures, signs and labels, personal protective equipment selection and use, and information on HBV vaccine. This video is specifically geared toward EMS.

**BLOODBORNE PATHOGENS -
THE OSHA STANDARD FOR INDUSTRY
OH 125V**

20 minutes

Fulfills many of the annual employee training requirements including understanding your exposure control plan, recognizing unsafe situations, emergency procedures, signs and labels, personal protective equipment selection and use, and information on the HBV vaccine. This video is specifically geared toward industry.

**BLOODBORNE PATHOGENS -
SCHOOL VERSION**

OH 232V

10:45 minutes

Though the risk of exposure may be low, the consequences can be high. Everyone needs to understand how the disease is transmitted and the use of universal precautions. Specifically designed for industrial workers and emergency response teams, this school version video for grades K-12 covers:

- Bloodborne pathogens
- Modes of transmission
- Exposure situations
- Proper clean-up of spilled body fluids

Universal precautions

**BONDING & GROUNDING OF
FLAMMABLE LIQUID**

SET 710V

10 minutes

Explanation of the need for proper grounding during the transfer of flammables, basic discussion of static electricity and the hazard it creates. Ensure employees understand how bonding and grounding eliminate electric potential and remind them of the proper pre-transfer steps.

CARE AND USE OF APR'S (Revised)

OH 216V

13 minutes

Explains how to use and maintain air purifying respirators correctly. Workers will understand the reasons for accurate fit testing and the importance of inspecting and fit checking a respirator before each use.

**CARPAL TUNNEL SYNDROME:
THE "KEY METHOD" OF PREVENTION**

SET 550V

15 minutes

For supervisors, aimed specifically at prevention before the fact. Supervisors are acquainted with the concept of look, listen and take action to prevent trauma disorders.

CAVE-IN RESPONSE

SET 690V

COLOR OF SAFETY, THE

SET 670V

16 minutes

Updated version of "Color of Danger". This film was developed from actual accident case histories and gives tips on avoiding accidents for all who work around material handling machinery.

COLOR OF SAFETY, THE**SET 504V**

26:30 minutes

Completely up-to-date version of The Color of Danger. This lift truck safety video is a guide for both experienced and new lift truck operators. Learn safe methods of operation, hazards and what to do in the event of a tip-over.

COMPRESSED GAS CYLINDERS**CET 758V**

14:45 minutes

Improper handling of compressed gas cylinders can cause devastating damage and severe injuries. Educate your employees on the proper handling of compressed gas cylinders with an increased awareness and respect for the hazards associated with compressed gas cylinders. This video covers:

- Potential hazards
- Pre-use inspection and testing
- Best safety practices for handling and use
- Proper storage and transportation

CONFINED SPACE CASE HISTORIES**OH140V**

14 minutes

Reenacts real life confined space accidents and emphasizes the importance of following proper confined space entry procedures including the use of appropriate personal protective equipment and ventilation.

CONFINED SPACE CASE HISTORIES**SET 725V**

14:00 Minutes

Reenactments of real-life confined space accidents emphasize the importance of following proper confined space safety procedures. Topics include: safety atmospheric testing and monitoring; training the entry team; ventilation; personal protective equipment; and reviews what went wrong and accident prevention.

**CONFINED SPACE RESCUE:
A JOB FOR PROFESSIONALS**

OH 145V

16 minutes

Interviews employees involved in a confined space fatality. Explains the hazards and motivates employees to call for a properly trained rescue team.

CONSTRUCTION BACK SAFETY

SET 723V

10:00 Minutes

Reviews safety techniques that will help workers maintain a strong and healthy back. Includes techniques to learn correct posture; lifting without injury; and preventing repetitive motion injuries.

CONSTRUCTION CONFINED SPACE ENTRY SET 722V

10:00 Minutes

Briefly and effectively covers the necessary skill for working safely in a confined space. Topics include: identifying confined spaces and their hazards; confined space entry permit program; and duties of confined space entry team.

**CONSTRUCTION HAZARD COMMUNICATION:
THE SYSTEM THAT WORKS**

SET 665V

23:01 minutes

A Hazard Communication program aimed at the construction industry.

CRANE SAFETY - OVERHEAD CRANES

SET 728V

18:00 Minutes

Prevent injury and equipment loss by training workers to safely work with and around cranes. Inspections, pre-lift considerations, safe operating and lifting techniques are covered. Other topics include gantry and E.O.T. pre-operation inspection and, slings, hood and magnets.

CRAWLER EXCAVATOR -

SAFE OPERATING TECHNIQUES

SET 736V

23 minutes

Help operators understand the importance of:

- thorough daily walk-around inspection
- correct use of the operators manual
- housekeeping & the effect on safety
- testing control functions
- variations in controls from model-to-model and make-make.

CRIME PREVENTION

SET 522V

4:42 minutes

CRITICAL MOMENTS

SET 664V

19:25 minutes

Viewers will relate to familiar, real-life scenes that identify how communication breakdown can create hazards on the job.

DAY OF THE KILLER TORNADOES

SET 606V

27 minutes

Gripping story of the day that 147 deadly twisters swept across Ohio, Kentucky and Alabama. How advanced preparation can help save lives.

DEFENSIVE DRIVING -

PREPARED FOR THE WORST

SET 708V

18 minutes

How to deal with road hazards, poor weather condition, vehicle collisions and crime. Shows how to stay in control by being prepared for the worst. Topics: Nature's forces, Night driving, Breakdown

basics, Accidents, Road construction, Personal security.

DINING ROOM SAFETY

SET 746V

10:00 minutes

Kitchen Safety Series

ELECTRIC CIRCULAR HANDSAWS

SET 545V

18:30 minutes

Both experienced and novice users of electric circular handsaws will find this interesting and informing. Covers types of saws available and their various safety features.

ELECTRICAL SAFETY:

DOWN TO THE WIRE

SET 663V

30 minutes (8-12 minutes each)

Three quick running videos on one cassette designed to help kick off safety meetings, stimulate discussions and get points across quickly.

ELECTRICAL SAFETY -

HIGH VOLTAGE AWARENESS

SET 734V

Working with 600 volts of electricity and higher. Understand the potentially destructive force of working with high voltage electricity. Learn the hazards associated in working with or around electricity. Graphics show lightening blowing up a substation. Covers the proper use of personal protective equipment, the use of general protective equipment, grounding equipment, gloves and hot sticks.

ELECTRICAL SAFETY -

HIGH VOLTAGE SAFE WORK PRACTICES

SET 735V

Working with 600 volts of electricity and higher. Step by step importance of lockout/tagout procedures, emphasizing the importance of following an established safety plan initiating safe work practices. Policy requirements and emergency procedures are explained in detail.

EMERGENCY PLAN/FIRE PREVENTION**SET 526V**

7:25 minutes

Discusses areas of primary concern for fire prevention, outlines procedures for location and operation of fire extinguishers, lists elements of emergency response plan. Illustrates emergency response drill.

EMPLOYEE TRAINING:**WHAT'S WRONG WITH THIS PICTURE?****OH 150V**

17 minutes

Examples of correct and incorrect chemical safety procedures are reenacted in a wide variety of work settings. Technical terms found on labels and Material Safety Data Sheets are clearly explained with interesting demonstrations.

ERGONOMICS IN THE WORKPLACE**SET 685V**

18 minutes

Ergonomics as it is practiced by workers and supervisors. How to spot and correct work station design and worker postures to keep workers healthy and productive.

EVERYTHING TO LOSE**SET 506V**

21 minutes

Shows the terrible consequences of ignoring shop safety rules - of taking foolish chances. (Same as SET 144F)

EXCAVATIONS, TRENCHES AND SHORING**SET 726V**

13:30 Minutes

Personnel who work in or around excavations and trenches need to be aware of the hazards and how to prevent cave-ins and other accidents. This video will

demonstrate an overview of protective systems, regulatory requirements, and safe work practices.

**EXPOSURE CONTROL:
BLOODBORNE PATHOGENS**

OH 136V

95 minutes

This program is a multimedia program which includes a video, workbook and audio program. It gives a background of the regulation, describes the elements of an exposure control plan, how to make an exposure determination, how to develop Standard Operating Procedures, housekeeping requirements, personal protective equipment selection and use, the HBV vaccination program, and post exposure follow-up.

**FALL PROTECTION:
PERSONAL FALL PROTECTION**

SET 507V

22 minutes

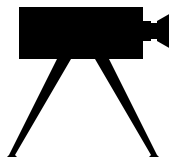

Explains the differences between fall restraint and fall arrest; requirements for lanyards, anchorages and body support; how to avoid common hazards; procedures for care and inspection of equipment.

FALL PROTECTION - TAKING CONTROL

SET 502V

11 minutes

Will assist in training employees to recognize and respect potential fall hazards in work place, and provide understanding of proper use and care of personal fall protection equipment. Also discusses the importance of a proactive safety attitude in

preventing work place falls.

FORKLIFT FUNDAMENTALS

SET 759V

In an effort to decrease the staggering number of injuries and fatalities this Forklift Compliance Package offers you the chance to comply with the latest training requirements. This Forklift Compliance Package includes two video programs.

Module A - 17 minutes

Forklift Fundamentals: Get The Facts

- Powered industrial trucks
- Controls and instrumentation
- Power plant inspections
- Equipment inspection

Module B - 18 minutes

Forklift Operations: Carry The Load

- Operating conditions
- Special hazards
- Vehicle and pedestrian traffic
- Proper load manipulation

FORKLIFT SAFETY: OPERATING SAFELY

SET 633V

20 minutes

Addresses safe forklift operation as a way of avoiding product and equipment damage and personal injury. Potential hazards are shown and rules of safe operation are demonstrated.

FORKLIFT SAFETY: OPERATION

SET 514V

20 minutes

Designed to inform employees of the procedures to follow when operating a forklift. Demonstrates capabilities of the truck, carry a load properly, and

safe driving skills.

GETTING OUT ALIVE

SET 702V

18 minutes

Managers, supervisors and employees can enhance their knowledge of fire emergency procedures with this new video. It includes vital information about developing an emergency evacuation plan or training employees about an existing plan.

GETTING THE FACTS:

ACCIDENT INVESTIGATION

SET 544V

18 minutes

Covers important points in accident prevention - a successful investigation of accidents.

GRAIN ELEVATOR HOUSEKEEPING

SET 531V

6:17 minutes

Summarizes cause of grain elevator explosions; neglect of day-to-day housekeeping; points out critical dust area. Illustrates the need for written housekeeping program; and describes regularly scheduled inspections needed to avoid explosion.

GRINDER & ABRASIVE WHEEL SAFETY

SET 709V

14 minutes

Avoid dangerous disintegration of wheels and encourage safe use of equipment. Abrasive wheel storage, inspection, mounting, use. Portable and bench grinders: safety tips, storage, use, PPE and maintenance.

GROUNDKEEPING SAFETY - BE A PRO

SET 705V

17 minutes

Teaches how to avoid unnecessary accidents by thinking: safe? or sorry? Topics include: Personal Protective Equipment, General checklist for safety, Tractors, riding mowers and push mowers, Trim and brush-cutting equipment and blowers, Checklist for

hazardous materials

**HAND INJURY PREVENTION:
IN TOUCH WITH SAFETY**

SET 503V

14 minutes

Train employees to follow safe work practices. Includes these topics: Pinch Points, Excessive Force or Repetition, Hot Spots, Sharp Objects, Toxic or Corrosive Chemicals, Electrical Shocks or Burns.

**HAND INJURY PREVENTION -
IN TOUCH WITH SAFETY**

SET 699V

14 minutes

Explains the potential hazards to which hands are exposed every day. Trains workers to avoid hand injuries and reduce associated costs of lower productivity and insurance claims.

**HAND SAFETY
SET 604V**

15 minutes

Teaches workers how to eliminate the leading causes of hand injuries. Demonstrates proper use of hand tools, safe procedures when working with equipment and machinery and safe use of sharp objects.

HAZARD COMMUNICATION

SET 741V

13:20 minutes

Step-by-step program emphasizes the right-to-know compliance for all employees. Train employees on the hazard communication requirements, including common terms and how to prevent exposure. Labeling systems and material safety data sheets. Safe

handling of hazardous materials. Differences between common hazardous materials. How to reduce or eliminate exposure.

**HAZARD COMMUNICATION:
A HEALTHY RESPONSIBILITY**

OH 160V

19 minutes

Trains your employees in the identification of hazardous chemicals, the use of product warning labels and understanding the Material Safety Data Sheet.

**HAZARD COMMUNICATION
EMPLOYEE TRAINING:**

WHAT'S WRONG WITH THIS PICTURE

OH 150V

HAZARD COMMUNICATION STANDARD

SET 542V

18 minutes

Describes responsibilities under the Right to Know legislation.

HAZCOM FOR CONSTRUCTION

SET 724V

10:00 Minutes

Outlines how to control chemical hazards on the construction site by using the Hazard Communication Standard. Includes recognizing potential construction site hazards, safety precautions and equipment, and written hazcom program.

HEARING CONSERVATION:

WHAT DO YOU WANT TO HEAR?

OH 234V

15:50 minutes

Each year thousands of workers suffer irreversible, noise-induced, hearing loss in the workplace. Most are the result of cumulative exposure to high levels of noise. Learn to prevent hearing loss and the associated costs at your company by creating an

awareness and respect for noise hazards and motivating employees to protect their hearing. Hearing loss is 100% preventable.

HEARING PROTECTION - IT MAKES SENSE OH 190V

22 minutes

Helps workers to understand decibel readings, describes for the worker how the ear works and tells how noise affects the human body. It details what can be done to protect the worker from hearing loss.

HOISTS & SLINGS

CET756V

14:45 minutes

Hoists and slings create the potential for serious accidents. This video will assist in training workers on proper sling inspection, selection and use to prevent material lifting accidents at your site. Types of hoists featured include: hand operated; air or electric powered wire rope; electric chain operated; and vacuum powered.

HOUSEKEEPING - IT AIN'T LIKE THE MOVIES

SET 706V

15 minutes

Review importance of good housekeeping and what to look for in your facility. Topics: Clean or clutter, Proper storage, eliminate spills and leaks.

HOW TO CONDUCT A SAFETY MEETING: A PART OF YOUR JOB

SET 684V

15 minutes

A humorous look at how safety meetings go wrong - and how to handle them correctly. Safety meetings can be productive, can involve everyone and can make a difference in your workplace.

HOW TO PREVENT FALLS **SET 530V**
4:54 minutes

**HUMAN BEHAVIOR -
REDUCING UNSAFE ACTS** **SET 201V**

INCIDENT INVESTIGATION **SET 697V**
16:25 minutes
Trains your employees how to conduct the step-by-step procedures to investigate accidents and near misses.

INDUSTRIAL HOUSEKEEPING **SET 609V**

INDUSTRIAL HOUSEKEEPING **SET 694V**
16 minutes
The cycle of unpleasant, dangerous and unproductive consequences of poor housekeeping on and off the job can be broken for all employees as it was for the three manufacturing employees in the program who learned to:

- Limit work and production supplies to work areas
- Keep walkways and working surfaces clean
- Clean up spills immediately
- Store tools properly
- Store/dispose of flammable/combustible materials
- Practice other techniques for preventing unsafe conditions

INDUSTRIAL HOUSEKEEPING **SET 516V**
16 minutes
How good housekeeping prevents accidents and improves fire prevention, quality, employee morale

and productivity.

INNER MIND OF MILTON WHITTY, THE **SET 173V**

18:30 minutes

An award winning film which depicts the contractor whose poor safety record is exposed in a scene in the court of his own conscience. *For management.*
(Same as SET 173F)

**IT WON'T HAPPEN TO ME:
ACCIDENTS IN THE WORKPLACE**

SET 622V

15 minutes

Discusses the major factors that cause accidents and why people take safety risks.

IT'S HAPPENED BEFORE

SET 701V

19 minutes

A system for reporting and investigating construction accidents is essential to prevention of future accidents.
(Same as SET 175F)

JOB SAFETY ANALYSIS **SET 667V**

15 minutes

Explains procedure for Job Safety Analysis (JSA) in industry. How to analyze every element of the job, assess potential hazards and productivity problems.

JUST ONCE **SET 180F**

JUST THAT ONE TIME **SET 675V**

15 minutes

Some people are chronic risk-takers. Others behave dangerously just one time. But the end results can be just as disastrous, as this film shows.

KEEPING YOUR MIND ON THE JOB

SET 676V

13:30 minutes

One of the causes of accidents is inability to concentrate. Lack of concentration affects factory workers, secretaries, executives, etc. Illustrates how concentration can really work.

KITCHEN FIRE SAFETY

SET 747V

10:00 minutes

Kitchen Safety Series

**KITCHEN KNIVES:
SAFE AND EFFICIENT USE**

SET 748V

10:00 minutes

Kitchen Safety Series

LADDER SAFETY:

SET 711V

12 minutes

Educate about ladder safety. Choosing a ladder - consider task, weight, capacity and composition. Inspection of rungs, safety feet, and moving parts. Extension, fixed and step ladder tips, 4-1 rule. Safe climbing tips, belt buckle rule. Ladder accidents - encourage first aid.

**LADDER SAFETY:
TAKE THE RIGHT STEPS**

SET 623V

15 minutes

Detective Joe Monday is on his way to help you promote safety.

LASER SAFETY

CET754V

15 minutes

Lasers are frequently misunderstood and misused. This video dispels the myths about lasers and teaches employees how to safely operate and work with all types of lasers. Workers will learn how to safely work with industrial lasers, including:

- Types of lasers and their classifications
- Potential hazards when working with lasers
- Engineering controls and safe work practices
- Proper eyewear protection for laser operations
- Preventing secondary injury from indirect exposure

LEAD SAFETY

OH 180V

18 minutes

Employees are trained in the proper awareness of lead, its health effects and the use of safe procedures when contacting lead.

LEAD - TREAT IT WITH RESPECT

OH 185V

17 minutes

Teaches your employees how to recognize and reduce exposure to lead, lead's long term health effects, how lead enters the body and what employees can do to protect their families.

LEARN FROM THEIR MISTAKES - HAZCOM CASE HISTORIES

OH 155V

20 minutes

Depicts true-life reenactment of Hazcom incidents concerning the Material Safety Data Sheet, warning labels, personal protective equipment and emergency responses.

LIGHTS, CAMERA, ACCIDENT **SET 508V**

18 minutes

Health and safety are very serious, but humor is used effectively to gain attention to safety hazards, the dangers of taking shortcuts on the job, not paying attention and making assumptions.

LISTENING SKILLS **SET 532V**

4:54 minutes

LOCKOUT-TAGOUT PROCEDURES **SET 543V**

22 minutes

Many tragic on-the-job accidents occur because proper lockout procedures are not followed in repairing and adjusting equipment. (Borrowers: Please note important instructions to viewers on tape cartridge.)

LOCKOUT-TAGOUT PROCEDURES **SET 742V**

15:05 minutes

Motivate workers to recognize the potential hazard of stored energy and follow established safe procedures. Step-by-step lockout/tagout procedures.

**LOMBARDI:
COMMITMENT TO EXCELLENCE** **SET 294V**

20 minutes

Motivational message by the late Vince Lombardi, NFL coaching great.

LOSS CONTROL FOR SUPERVISORS

SET 671V

10 minutes

Demonstrates direct and indirect costs as well as the importance of education in safety and health.

MACHINE GUARDING

SET 720V

14:00 Minutes

Workplace injuries and death occur because a machine was never safeguarded or the guard was removed. Workers must understand and use the best form of protection - machine safeguarding. This video includes the following topics: categories and types of machine guarding; explanation of how machine guarding works; importance of safeguarding; places where most machine hazards occur; and safety control devices.

MACHINE LOCKOUT

SET 553V

MAKE IT SAFE

SET 743V

First-Half of video is English.

An injury prevention program for Hispanic farm families covering:

- Emergencies. Identify emergency situations & basic steps for handling emergencies effectively and efficiently.
- Safety Around Animals. Learn to identify different types of dangers associated with both tame & wild animals.
- Human Factors. Promote positive safety attitudes and behaviors through interactive instruction on basic

injury control principles.

- Signs & Symbols. Identify and understand the meaning of safety signs and symbols.

**MAKING OF JSA, THE:
JOB SAFETY ANALYSIS**

SET 730V

16:00

Supervisors or safety team members will appreciate this lighthearted approach to learning about how to conduct a JSA. Topics covered are criteria for selection, breaking the job into steps, identifying the hazards for each step, and developing procedures to eliminate hazards.

**MATERIAL SAFETY DATA SHEETS -
READ IT BEFORE YOU NEED IT
SET 718V**

20:00 Minutes

This video will help your employees use and understand the MSDS and in so doing help to control the chemical hazards. Topics include: product information; exposure situations; hazard prevention and personal protection; toxicology, ecology and disposal; transportation; and regulatory information.

**MECHANICAL POWER PRESS SAFETY -
DON'T PRESS YOUR LUCK**

SET 721V

19:00 Minutes

This video will motivate your workers to follow proper safety procedures, help you comply with mechanical power press safety regulations and review safety tips

for operators. Topics include: types of presses; safeguarding devices; safely operating a press; and inspections and maintenance.

**MIOSHA: YOUR WORKPLACE PARTNER
ONSITE CONSULTATION SERVICES**

SET 744V

12:00 Minutes

This video, produced by MIOSHA Occupational Health and Safety Education and Training Divisions, features six Michigan companies who have successfully used MIOSHA onsite consultation services. An effective safety and health program can help you prevent injuries, illnesses and accidents-- and at the same time, help save you money. The onsite consultation program is part of a complete series of MIOSHA services to help companies with their safety and health practices.

NO INJURY NO ACCIDENT

SET 505V

19 minutes

Zeros in on an often neglected safety area - near misses and insignificant incidents that result from unsafe acts and conditions that can cause major accidents and serious injuries.

**NOISE INDUCED HEARING LOSS:
NO SECOND CHANCE**

OH 195V

20 minutes

Features interviews with employees suffering hearing loss to send a powerful message to workers on

wearing hearing protection. Explains the ear, effects of noise exposure and the steps to an effective hearing conservation program.

NURSING HOMES: HAZARADS & SOLUTIONS CET 762V

16 minutes

This video discusses the ergonomic hazards, primarily back injuries, associated with resident transfers. Techniques to minimize resident transfer hazards to both the nursing home resident and to the nursing home employee are provided. The video also describes OSHA's strategic plan for reducing injuries and illnesses in long-term care facilities.

OCCUPATIONAL HEAT STRESS

OH 205V

15 minutes

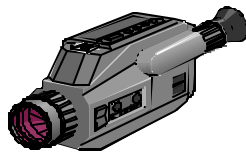

Methods of preventing heat stress through the use of engineering controls, appropriate work practices and personal protective equipment (i.e. ice vest) are shown. Important first aid procedures are explained.

OFFICE ERGONOMICS-IT'S YOUR MOVE

SET 760V

16 minutes

Most employees do not associate the office environment with risk of injury. Yet musculoskeletal disorders (MSDs) are the fastest growing workers' compensation cost for businesses. The goal of ergonomics is to fit the job to the worker, not the worker to the job. Superior, high-resolution graphics help explain how the musculoskeletal system works and how to limit injury. This video identifies:

- Causes and Types of MSDs
- Proper Posture and Body Mechanics
- Workstation Design Factors

OPENING PROCESS SYSTEMS:

Part I - Planning and Preparation

SET 716V

16:50 minutes

Provides an understanding of the hazards of opening process systems, and the importance of planning and preparation in the prevention of line or vessel opening accidents and injuries. Topics covered include identifying the contents of a process line or vessel, developing a thorough plan for safely performing each step in the line or vessel opening procedure, and determining the need to use recommended personal protective equipment.

OPENING PROCESS SYSTEMS:

Part II - Performing The Work

SET 717V

15 minutes

Provides an understanding of the hazards of opening process systems, and the importance of planning and preparation in the prevention of line or vessel opening accidents and injuries. Topics covered include performing system shut down, lockout procedures, depressurization, draining and purging, isolating the work zone, obtaining the necessary permits, safely opening the system, performing the work and closing the line or vessel.

OXYACETYLENE SAFETY - REVISED

SET 695V

25 minutes

Shows the importance of following basic safety rules when working with oxyacetylene mixtures. Ten rules

of oxyacetylene safety are given and illustrated. The program also demonstrates the serious dangers and effects of misuse of oxyacetylene equipment.

PERFORMING JOB SAFETY

HAZARD ANALYSIS

SET 501V

Training guide and video to enable supervisors and team leaders to take a practical, systematic approach to managing health and safety.

PERMIT REQUIRED

CONFINED SPACE ENTRY

SET 519V

21:17 minutes

Protect your health and safety with proper training and by following safe work practices. Learn to control a permit-required confined space environment and prevent accidents which could lead to injury or even death.

POWER AND HAND TOOL SAFETY

SET 668V

23 minutes

Presents potential dangers of not using tools safely, methods of selection and inspection of tools.

PRESSES, PRODUCTION AND PROTECTION

SET 210V

11 minutes

Improving safety on the operation of mechanical power presses.

PREVENTING BURNS IN THE KITCHEN

SET 749V

10:00 minutes

Kitchen Safety Series

PREVENTING CUTS AND STRAINS

SET 750V

10:00 minutes

Kitchen Safety Series

PREVENTING FALLS

SET 751V

10:00 minutes
Kitchen Safety Series

PREVENTING HEARING LOSS

OH 200V

11 minutes

Educates employees about risks to their hearing. Explains how excessive sound levels can damage hearing, how to protect your hearing from damaging sound levels and steps to take if a worker experiences symptoms of hearing loss.

PREVENTING MACHINE INJURIES

SET 752V

10:00 minutes
Kitchen Safety Series

PROCESS SAFETY MANAGEMENT

SET 704V

18 minutes

This vital video program will help supervisors comply with OSHA's process Safety Standard. It covers crucial compliance information and training requirements. Such as; Explanation of OSHA Standard, Employee participation, Compliance audits, and Emergency response and follow-up.

**PROCESS SAFETY MANAGEMENT:
IT'S JUST GOOD BUSINESS**

SET 715V

30 minutes

Addresses application, threshold quantities of certain chemicals, reviews each of the fourteen key sections of the process safety management standard.

PROTECT YOUR SIGHT

SET 678V

15 minutes

Eye safety can't be emphasized enough. This is a film that adds importance to all the eye safety concerns you have been talking about.

PUBLIC ASSEMBLY FIRE SAFETY

SET 692V

14 minutes

Features footage from fire emergencies where many people were confronted with life or death choices en route to their escape from burning structures. Emphasizing the responsibility that organizations have to prevent fires, protect exits and plan evacuations, the video offers employees and managers a unique view of tragedies that could have been prevented with proper training and practice.

REMEMBER CHARLIE

SET 745V

56:49 minutes

A deeply moving portrayal of the devastating real-life consequences of the abuse of safety procedures. Designed to motivate audiences to handle all aspects of their lives with greater awareness and appreciation of safety. Learn to become more responsible for your own safety on the job, at home, and at play. Dramatically changes safety attitudes from uncaring, apathetic and routine to safety first & always.

RESPIRATOR SAFETY (Revised)

OH 215V

11 minutes

Explains what kinds of respiratory hazards a worker might face and why these hazards require protection. Discusses the importance of wearing respirators when required.

**RESPIRATORY PROTECTION -
ANOTHER WORLD**

OH 210V

19 minutes

Instructs workers on how to avoid exposure to airborne hazardous substances that can lead to serious health effects through the use of respiratory protection.

**RESPIRATORY PROTECTION:
THE INVISIBLE HAZARDS**

OH 239V

13:20 minutes

An overview of the respiratory system, how it works and how it can be damaged. Specific hazards are addressed and preventative measures to safeguard your respiratory system. The program covers:

- The importance of the respiratory system
- How potential hazards can affect workers' health and safety
- Types of respirators and their functions
- Importance of qualitative and quantitative fit testing

RESPONSIBILITY TO ACT

SET 691V

22:14 minutes

A true, tragic story of a school fire. The viewer sees how any one of many people could have RECOGNIZED hazards and then TAKEN ACTION to prevent the tragic outcome - but they didn't! Learn a four-step process - SEE, QUESTION, REASON, ACT - which is applied to office and industrial hazards in the video. At the end, employees will recognize their own "Responsibility to Act".

RETURN OF MILTON WHITTY

SET 216V

17:30 minutes

An award winning film. A dynamic and forceful sequel to "Inner Mind of Milton Whitty" film.

**RIGGING AND LIFTING WITH MOBILE
CONSTRUCTION EQUIPMENT**

SET 738V

27:30 minutes

Practical advice and real-world cautions on how to do on-

site lifting jobs safely. Operator/Rigger teamwork, Analyzing the load, Determining proper rigging, How to figure and adjust for center of gravity on odd shape loads, Effects of various type hitches and angles on sling strength.

RISKY BUSINESS (OFFICE SAFETY)

SET 682V

20 minutes

Offices are not necessarily safe environments. Hazards in offices are exposed in an entertaining but very informative format.

ROOFER'S PITCH

SET 218V

21:30 minutes

This is a movie dealing with the roofing industry, showing pre-job planning and education for roofers.

SAFE RIGGING

SET 731V

20:00 Minutes

Explains the procedures involved in rigging for a safe lift. Emphasizes the importance of paying attention to the rated capacity of all lifting equipment and explains variables that can make the difference between a successful lift and disaster.

**SAFE USE OF HYDRAULIC BREAKERS,
SHEARS AND CRUSHERS**

SET 737V

17:30 minutes

How to use impact breakers, metal shears and concrete crushers from pre-operation inspection to long term storage. How to conduct daily pre-start inspection. Checking the tool suspension system. Correct tool selection for the job. Carrier machine positioning when working with a breaker. Tool point types and applications.

SAFETY BY DESIGN

SET 681V

13 minutes

Ergonomic impact of environmental design is explained. Special observation and interviewing techniques are utilized to bring about common-sense solutions to ergonomic problems.

SAFETY IN A CONFINED SPACE

SET 520V

6:52 minutes

Explains procedures for maximum safety in a grain elevator permit required confined space; includes a checklist of necessary measures, confined space safety concepts and training requirements.

SAFETY IN THE RETAIL WORKPLACE

SET 688V

SAFETY SECRET, THE

SET 662V

25:00 minutes

Good safety principles are the same whether they are in a factory or office. Shows how to take time to practice what you already know.

SAVING SIGHT

SET 607V

19 minutes

Motivates employees to use proper eye protection through demonstration of eye injuries and demonstration with doctors concerning accident causes.

SCAFFOLDING SAFETY

SET 727V

15:00 Minutes

Covers requirements for erecting, dismantling and maintaining scaffolds. Includes potential hazards, types of scaffold, ladder construction and, assembly and dismantling requirements.

SCAFFOLD SAFETY - IT'S NO JOKE

SET 733V

16:50 Minutes

Reviews the safety requirements which apply no matter what type of scaffold in being used. Examines who can

design and build a scaffold, things to look for before getting on a scaffold, fall protection and general safety procedures. Highlights setting up a scaffold, defective or damaged ropes or planks, use of substandard guardrails, working around overhead electrical lines, and overloading the scaffold.

SCAFFOLDS - SAFETY AT ALL LEVELS

SET 732V

10:00 Minutes

Covers the role of the competent person, pre-assembly inspection, assembly, pre-shift inspection, safe work practices, and fall protection.

SHAKE HANDS WITH DANGER

SET 247V

24 minutes

Servicing and maintenance work around heavy equipment and in the shop calls for close attention to the rules of safety. This video has a message for those working with heavy machinery and common shop tools.

SKIN CARE AND SAFETY

SET 703V

13 minutes

When it comes to dermatitis - and most other skin problems - prevention is much easier and far less painful than treating a full-blown skin problem. And prevention at work and at home is what this program is all about. Employees learn six important rules that will help them prevent skin problems:

- Be aware of skin hazards
- Be aware of environmental hazards
- Wear the appropriate personal protective equipment
- Handle chemicals with care
- Follow housekeeping and hygiene rules
- Get medical attention

SLIPS, TRIPS & FALLS**SET 511V**

16 minutes

Office workers account for more than twice as many slips and falls as non-office workers. Explains the art of preventing falls.

SMALL SPILLS AND LEAKS**SET 707V**

18 minutes

Focuses on controlling small spills and leaks. Covers essential procedures all employees should know if a leak should occur on their shift. Topics: Supervisor notification, Securing the area, PPE, Controlling and containing the spill, Cleanup/decontamination.

STEP RIGHT UP**SET 254V**

19 minutes

Ernie manages to violate nearly every safety rule concerning ladders. A funny, highly motivational video about ladder for home and industry. (Same as SET 254F)

SUPERVISING SAFETY:**YOU MAKE THE DIFFERENCE****SET 611V**

19 minutes

Discusses the factors that influence accidents. Techniques supervisors use to help change behaviors to reduce accidents.

SUPERVISORY SAFETY:**MAKING IT HAPPEN****SET 610V**

15 minutes

How physical, language and emotional barriers are all factors that affect communication between supervisors and employees. Also discusses importance of supervisor's role as a model for promoting safety.

**TAKING CONTROL OF YOUR
MOTOR GRADER**

SET 740V

19 minutes

Modern motor grader controls and functions are shown in this video designed to improve operator skills.

**TECHNIQUES FOR
AVOIDING BACK INJURIES**

SET 608V

17 minutes

Proper lifting techniques and posture techniques that reduce back strain; an overall wellness program. (Same as SET 277F)

TORNADO - A SPOTTER'S GUIDE

SET 513V

A guide for identifying tornadoes and the cloud structures that produce tornadoes.

TRENCHING & EXCAVATION SAFETY

SET 686V

16 minutes

Trenching and excavation accidents continue to cost workers their lives. Regulatory agencies target them for the most serious violation categories. Get a close look at methods for minimizing these hazards.

**TUBERCULOSIS (TB) - PREVENTION AND
PRACTICES FOR HEALTH CARE WORKERS**

OH 225V

22 minutes

Complies with Centers for Disease Control policies. Discusses the symptoms and transmission of TB, the TB epidemic, multi-drug resistant TB and ways to prevent transmission.

**TUBERCULOSIS (TB) -
OSHA/CDC GUIDELINES
FIRST RESPONDERS**

OH 220V

20 minutes

Complies with OSHA's policies. Trains on symptoms and epidemiology of TB, risk groups, transmission, post exposure management and the exposure control plan including personal protective equipment and engineering controls. Geared specifically toward EMS.

UNDERSTANDING ASBESTOS HAZARDS

OH 105V

19 minutes

A dynamic and easy to understand program that has trained thousands of workers on awareness and abatement techniques. Live action footage of actual asbestos removal from steam pipes using glove bags as well as other large scale techniques.

VALVE SAFETY

CET757V

15 minutes

Proper valve safety training can limit accidents and prevent injuries while saving time, money, and lives. This video emphasizes ergonomics and the best safety practices to prevent strains, sprains and incidents when operating valves. The following important information is covered:

- Recognizing different types of valves
- Identifying common valve hazards
- Step-by-step valve risk assessment
- Ergonomic issues related to valve safety
- Best safety practices for working with valves

WHAT'S IT ALL ABOUT: HAZARD COMMUNICATION

OH 165V

11 Minutes

Introduces employees to the hazard communication requirements for hazard evaluation, warning labels, Material Safety Data Sheets (MSDS), written programs and employee training. Explores both employer and employee responsibilities.

WHAT'S WRONG WITH THIS PICTURE:

HAZARD COMMUNICATION TRAINING

SET 683V

17 minutes

In addition to providing basic information, hazard communication is intended to help workers in given chemical situations. This feature examines how to make "haz-com" work for you.

WHEN FIRE STRIKES:

COMMERCIAL KITCHEN EMPLOYEE

SET 693V

14 minutes

Encourages fire safety awareness and prevention in commercial kitchens by showing how attitude, prevention and reaction can control fires and their damage. Shows the roles of management and employees in fire safety and preparedness, and how a team approach makes kitchen fires less likely.

WINTER DRIVING TIPS

SET 687V

17 minutes

Reviews special safety techniques to help employees overcome winter driving hazards.

WORKING KNIGHT

SET 510V

11 minutes

How to inspect and wear modern personal protective devices - hard hats, gloves, eye wear, hearing protection, safety shoes, etc.

WORKING AROUND CRANES**SET 719V**

19:00 Minute

Inspection techniques to make sure your crane is ready to do the job. Techniques include daily and monthly inspections; rigging; and preparing for inspection.

**WORKING ON AERIAL LIFTS,
CRANES & SWING STAGES****SET 679V**

15 minutes

Explains the importance of inspecting aerial equipment before start of work, warming up engine and hydraulic systems, maintaining safe clearance from electrical current and wearing hard hats and other safety gear.

**WORKING SAFELY WITH
PORTABLE INDUSTRIAL GRINDERS****SET 512V**

10 minutes

Area safety, personal protective equipment, equipment checks and proper operation of both straight and side grinders.
